

Mount Washington Transfer Station Narrative November 28, 2017

Mount Washington's transfer station is located next to the Highway Department on Cross Road. There is an attendants shed, a compactor for MSW and two roll-offs for recyclable materials. Twice per year they hold bulky waste collections and use their salt shed to store the roll-off. The transfer station is along the road and there is no fence or gate. The attendant keeps the area clean of litter and the shed and all equipment are in good working order. Gail Garret, Selectmen, met with me and discussed adding a potential food waste drop-off area. No decision has been made as it is still being investigated.

List of waste and recyclables accepted:

MSW – 20 yard compactor

Paper – 20 yard dome dumpster-2/3 full

Containers-20 yard dome top dumpster-1/2 full

Attendants Shed

Waste Ban sign and emergency number

Trash Compactor

Recycling roll-offs

Area being considered for onsite composting

Hours of operation
